The genial assemblyman, who always draws a nice audience here, sent this work back to Alpine voters: "It was indeed gratifying and heartwarming to meet again with so many of my friends and neighbors from the district. I hope that they all will take back the word to their respective communities that my office, staff and myself are available at all times for any assistance that we might provide."

## America now facing 3 radical dangers.

The prosperous United States is facing perhaps the most critical period in its later history, extreme problems in three areas: spiraling taxes and a possible depression, the racial riots, and the health of the people.

Perhaps the most distressing problem today, for it affects all the little people, is the increasing danger in rising

taxes on all levels; federal, state and county. When we listen to the talk around the grassroots, we hear a continuous rumbling from the people.

The constant spiraling of taxes, if it keeps on, will kill ambition of the worker so that soon there will be none left to tax! People are talking of quitting; what's the use; and why not go on welfare?

No small business can operate like our three main levels of government do - spend more than they earn or take in. The only result is bankruptcy to the small man, or depression in government.

Our so-called temporary taxes, as excise, and others, put on as war measures, are about as permanent as regular property taxes. We face rising sales, gasoline, and many other taxes, plus income and social security, which is supposed to be a donation! But the workers still have to pay it, and all the rest.

We do not need to dwell upon the second phase of our danger, the racial riots, pillaging and shooting, but it is an ever present and a sadly growing danger that must, sooner or later, be remedied.

As to the health problem, everyone that reads knows that smoking is guilty of causing lung cancer, emphysema and other troubles, and that ailments of the heart and other organs are increasing at a most alarming rate.

These radical dangers need radical remedies. -CI

## HORSE TALK

Cynthia Irvine Mc Taggart

Eileen and June Dun went through a harrowing experience Sunday evening. They were getting ready to go on a ride. Eileen was holding June's registered thoroughbred Red Mare when she got scared and broke away. Eileen went after her on Rita and caught up with her but the owner of the property frightened her away. She raced away and got caught in a barbed wire fence which tore one leg badly and broke the other. She had to be put to sleep which was a tragedy and we all feel badly about the accident.

Susie Parsons sold Cricket, her filly, to a girl in Lakeside. She plans to keep Lolita as they couldn't ride the filly and her brother Mark isn't interested in horses any more.

Mitchel and Stephen Smith are having loads of fun with the pony that Mitchel won at the Del Mar Fair. They are riding him while their mother and father leads him around and he doesn't mind it at all.

George Archer is again in the saddle. He had a chance to buy a 6-year old Palomino gelding from a man in Spring Valley and is real happy with King. One night last week he was out in front with the horse and a girl who lives in Palo Verde stopped to talk to him. She said she used to own the horse, so next time she stops, George will get her name. Mr. Rood, the Archer's neighbor, also likes to ride so now they will take turns.

Shirley Bennett still has her big dapple gelding for sale. Kim, 7 and Mark, 4, are just too little to ride him, so they are looking for a smaller horse. Call 445-3161 if you are inter-

Shinji Suzuki, 20, Dr. Roger Larson's friend from Japan, takes short ride on Celeste's mare Red. Was his first ride on horse, did a good job but when it was time to get off said "Now, how to get down?"

ested in a horse that is well broken and has a nice, sweet disposition.

Friday night the Alpine Riding Club met under the trees at the YC for a weiner roast. President E. B. Reid was overwhelmed with the turnout. Most of the members came, brought their family and we all had a wonderful time.

For some weeks Bob Smith has had his nice donkey Clarence for sale but couldn't seem to find a buyer until I told June Dun about him. They went up Monday afternoon, looked at him and bought him on the spot. Eileen rode him home. Clarence is a good donkey, has been trained to pull a cart and is a real nice pet.

Man may have only a brief 100 years to live on this planet if the smog problem is not met, and soon, is the opinion expressed last week by Dr. Morris Neilburger, Meteorology Dept., UCLA.

Another expert on smog is Dr. E. A. Schuck, Air Pollution Center, UC at Riverside, who says that the world's air supply is limited, and purification is a fallacy, for when it is burned in cars and planes, it is gone, and thus man may become extinct, a victim of his own technology.

Three crop damage areas on the coast cause loss of \$10 million a year, \$18 million on the East Coast, and California crop loss is over \$100 million, facts, not fancies.

But Alpine, with its 1800 to 2600 elevation, is free from a lot of this, but the pollution table is rising gradually with the terrific increase in internal combustion engine and jet uses.

Note The Bible foretells just this situation: destruction by fire! CI

In a letter to his nephew, Alex Paris of Oakland, writes Al Smith, realtor in Alpine: "For several years we have been receiving the Alpine Sun and I presume it is being sent to us through your kindness, many thanks. It is quite a paper and keeps us posted on the activities of the Alfred Smiths. Have noticed that Nancy visited you folks awhile back; that Kay performed the hula and that Al Smith recently sold a parcel of land and also that he has some for sale in that locality providing of course, that these lots can be reached on a sure-footed mule'."

Andy the former cement man who told last week about the packrat at his place, said "I'd like to know how to dispose of these rascals, do you trap or poison them, and what do you use?". Solution, anyone?

## DOUBLE TALK

By Cecile and Celeste Irvine

It hardly seems possible that summer vacation is almost over but school is staring us all in the face. We were in Hemet all summer except on weekends and failed to take the entrance exams for Grossmont College. So this week we are enrolling in San Jacinto College and will attend until new classes start at Grossmont in the spring and we can transfer.

We are still working with our folk singing so don't want to disrupt it by coming home so will be up here for a few more months. It is only two hours drive so will spend as many weekends in Alpine as possible.

Daddy, Al Smith, his wife and daughter, Russell Kiehn and Jerry Cullins flew up Sunday and attended our family reunion and also to hear us sing at the theater. After dinner Daddy flew the Cherokee home in 30 minutes to Gillespie Field.

Mike Webb has been in the High Sierras with his mother's sister and family all this week and is expected home Wednesday. Timmy and Chris stayed home to keep their mother company.

Bob Blocker was graduated from the MCRD Sunday with his platoon winning an honor award. He goes to Camp Pendleton for more training, then overseas, probably to Viet Nam.

Ronda and Debbie Lewis, grandchildren to Mr. and Mrs. J. W. Clark, Tavern Road, spent 10 days here visiting them. They live in El Cajon but love to come up to Alpine.

Jimmy Archer was thrilled when his dad gave him an old truck. He worked a few days on it cleaning the engine and got it started. Now it runs good as new and he had the fun of making it run. His brother, Don, who has been working all summer for Hazard Block, enters Grossmont College for a 2nd year this next week.

Mrs. Betty Rash told us that they think someone poisoned their little pup that had wandered in some weeks ago. They fed him and he was so happy to have a home but some people are mean enough to slip a defenseless animal poison. He died without too much agony which was a blessing.

Mrs. Julia Cook, who had taken care of Mrs. Bradley in her home, South Grade Rd., before she died, had returned to live here when she died recently. She left a nephew in N. Y. City. She was a native of Wisconsin.

In her letter to Miss Burdett asked "is the Alpine Sun still being published", would like to see a copy if it is, as it just fascinated me, also members of the newspaper office. Mrs. Peterson is Ruth's uncle's daughter.

**CARE OF THE BODY**

By Frances McTaggart

**DID YOU KNOW THAT. ....**

Blood coming from an artery is very bright red and blood coming from a vein is dark red or purple?

New blood cells are born every 14 days.

The quantity of blood contained in an adult body is about 1/20 of the body weight, so in a healthy adult weighing about 160 lbs. there would be about 8 lbs or 4 quarts of blood.

The time it takes for blood of humans to clot is about 5 minutes.

In rare individuals blood does not clot readily or at all this condition is called Hemophilia.

Arteries are located usually in the deeper tissues of the body while the veins are closer to the body surface?

Some functions of the blood are: Carries oxygen from lungs to tissues. Carries food material to tissues. Distributes the heat formed in the deeper parts of the body and in this way maintains the constancy of body temperature. It carries away waste materials to organs of excretions. Aids in maintaining acid-base balance of tissues. And Carries hormones and internal secretions.

Grace Wilcox, president Alpine Woman's Club, announces a board meeting Tuesday, Sept. 5 at 1:30 at the Club House, asks that all board members come.

Hugh Trail is in EC Valley Hospital for observation, having been taken there Sunday by his wife. He is doing well and improving.
